Nizza? Nice!

Already during the first half of 2020, our new product Nizza found many enthusiasts. The high quality and shapely bottle impresses with its simple design and its wonderful advertising possibilities. In addition to the 0.75 litre version, we offer our customers different options for custom-made products. Available are for example sizes between 0.5 and 1 litre and lid or bottom design. Different colour coatings (powder coating) and material configurations are possible. If you are interested in one of the exciting variations of the Nizza bottle, please contact us!

High quality powder coatings

In addition to the classic stainless steel look, we offer Nizza and many other products in colour versions with high-quality powder coating. This type of coating ensures a longer life-span of the bottle as well as a better durability of your customised logo. In addition, the production process is ecologically sustainable. Special colours or combinations are possible even from small quantities.
