We look forward to continuing our journey together, full of ideas and successes.

Yours faithfully, Volker Griesel

1. EFFECTIVE

Your imprinted brand is shown every time the umbrella is used – by the users themselves and therefore unbeatably credible.

2. ALWAYS AT HAND

Always there thanks to real added value – with a lasting positive effect on the user.

3. VERSATILE

Whether as a gift, merchandising item or for sales promotion.

4. FLEXIBLE

5. LONG-LASTING

Thanks to high-quality materials, the advertising effect lasts for many years.

6. EYE-CATCHING

Hardly any other promotional item offers so much space to showcase your brand.

9. AWARD-WINNING

Many FARE® models have won prizes for design, sustainability or originality.

10. AFFORDABLE

WATER-SAVING COLOURED COVER MATERIAL MADE FROM RECYCLED PLASTICS

Thinking progressively is good – but it's progressive action that makes the difference. As part of our sustainability strategy, we introduced the **revolutionary waterSAVE® dyeing process** in 2020: The yarn, which is made from recycled plastics, is dyed all the way through during the production process.

This has **advantages for the environment** compared to the conventional process, in which the yarn is first produced and then dyed in a further step.

AND THIS IS HOW IT WORKS:

Plastic waste is collected, cleaned ...

... and processed into granulate.

When heated and melted, it becomes a polyester fibre, ...

... which, woven as fabric, becomes the **cover of our umbrellas!**

All **waterSAVE®** models are **labelled on the closing strap**, which only becomes visible when opened.

WATERSAVE® IS COLOURFUL!

While initially only black umbrellas could be fitted with this sustainable cover in 2021, **additional colours and many models** have been added since 2022. For example, our popular **ÖkoBrella family** has been converted to **waterSAVE®** cover material.

SUSTAINABLE HANDLES MADE OF RECYCLED ABS – ECO-FRIENDLY AND HIGH-QUALITY

Recycled **A**crylonitrile **B**utadiene **S**tyrene (**rABS**) consists of disposed ABS products that are processed into new high-quality products – **recycling in top form**.

rABS retains the strength, durability and impact resistance of the original material, while **significantly reducing the carbon footprint** by giving the raw material a second life. We use **rABS** in several models, e.g. in the handle, cap and lanyard click closure of the new **FARE® FiligRain ToGo** (item 5162).

* Calculated based on water savings of 2 million litres of water for processing around 300,000 m² of fabric, from which around 350,000 umbrellas can be produced.
