# WORK

## Bestsellers

We connect brands with people.  
Our products create identity.

Whether for events, the office, or construction sites, Daiber workwear ensures your team is perfectly equipped for any challenge.

Our corporate fashion concept provides a uniform, professional appearance with maximum comfort.

We offer a wide range of sizes from XS to 6XL depending on the item – for men, women, and unisex. Ergonomically designed cuts take classic body types into account. In addition, some items are available in regular fit or slim fit to suit individual proportions.

Based on the mix-and-match principle, tops and bottoms can be combined individually – for the perfect fit for each team member.

Modular combinations and customizable decoration – turning your appearance into a strong brand ambassador with high recognition value.

Daiber. Visible. Wearable.

# IN 4 STEPS TO CORPORATE FASHION

## STEP 1 CHOOSE ITEM

From head to toe, from functional jackets to colour-coordinated shirts: thanks to our **wide range of colours and styles**, every company can easily find the perfect corporate outfit.

## STEP 2 PERSONALISE

**Where would you like to place your advertising statement?** Our experts will advise you personally on the best place to put your logo or slogan.

## STEP 3 PLACE LOGO

**Every item in our collections** is suitable for **impressive decoration**. Whether printed or embroidered, your logo will be right at the forefront. High-level customisation !

## STEP 4 ORDER EASILY

## PANTS

Hard-wearing and flexible –  
a perfect fit for every figure.

**108-131**

## ACCESSORIES

Smart and robust – the extra  
for work and leisure.

**132-141**

# PRODUCT GUIDE

## SUSTAINABILITY

### Organic cotton and recycled polyester

For us, corporate responsibility also includes fair treatment of our environment, for example through innovative, durable collections made of organic cotton and recycled polyester. We are convinced that we can only grow together and move towards the future with courage - as we have been doing for more than 100 years.

#### Recycled Polyester - PET bottles are recycled to create a new Fashion

Collected plastic bottles are crushed, melted down and spun to yarn again, which is sometimes completely integrated into the production. Thus for producing the workwear cap MB6234 about 3 half-litre bottles are recycled.

Certified by Ecocert  
Greenlife TE-00302043

#### Organic Cotton Collection - Clothes with inner values

Fair, transparent, harmless: The Organic Cotton collection includes a wide range of sustainably produced organic cotton clothing for every fair fashion lover.

The Organic Cotton collection by Daiber impresses with a high quality combined with modern cuts and tasteful details. The naturalness is not only visible but also perceptible. Knowing that the components of the garment are made of sustainably grown cotton and that no genetically modified fibres are used conveys a completely new attitude towards life.

#### OCS Standard

In the production of Daiber textiles, the Organic Content Standard enables the exact proportion of organic material in a product to be recorded and tracked through the production chain. The upcoordinate 'Content Claim Standard' defines, among other things, the traceability of goods and transparency in the superordinate production chain for the OCS.

# FUNCTIONS & FEATURES

If you really want quality, you invest in the details. That's why daiber's best-selling workwear is made from high-quality functional materials and features high-quality finishes. May we introduce you to our brands and their features at a glance:

## CORDURA®

CORDURA® is a very sturdy, textured polyamide fabric, which is extremely tear- and abrasion-proof. Special yarns, specially developed weaving techniques, dyeing methods and additional textile finishing ensure that products with CORDURA® can be used as durable and comfortable workwear.

## THINSULATE™ Insulation

The light-weight thermal insulation affords optimum protection against cold despite its minimum thickness. It even keeps you warm in damp or wet conditions. Thinsulate™ INSULATION offers excellent comfort and allows optimum room to move. It is extremely breathable, durable and easy-care.

## SORONA® Aura

sorona® AURA fibers consist of 37% vegetable components, obtained from renewable raw materials. Garments with sorona® Aura offer an eco-friendly alternative with outstanding breathability, lightweight comfort and efficient heat retention. sorona® AURA offers the perfect mix of sustainability and performance.

## BIONIC-FINISH® Eco

BIONIC-FINISH® was developed, following the example set by nature, 'learning from nature'. The textile is protected against water and dirt by a very thin crystalline structure. BIONIC-FINISH® ECO protects man and nature.

## Softshell

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

## Taped Seams

To avoid moisture penetrating into the fabric, seams and stitches can get taped. Taped seams are 100 % water-proof.

## Breathability / Permeability to vapour

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m<sup>2</sup> within 24 hours. The higher this figure, the more breathable the textile is.

## Water column

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.

## UPF 50+

The UPF (Ultraviolet Protection Factor) indicated on UV-protective clothing shows how much longer somebody wearing these clothes can stay in the sun without suffering any damage to health. Therefore, the UPF-indication on textiles corresponds to the sun protection factor of sun-screens. This is based on the self-protection time of the skin, which varies considerably depending on the individual skin type.

**Outer fabric:** 79% polyamide, 11% polyester,  
8% polypropylene, 2% elastane

## UPF 50 +

**Coming to grips with the sun  
thanks to workwear with  
certified UV-protection**

### The more UPF, the better

The UPF (Ultraviolet Protection Factor) indicated on UV-protective clothing shows how much longer somebody wearing these clothes can stay in the sun without suffering any damage to health. Therefore, the UPF-indication on textiles corresponds to the sun protection factor of sunscreens. This is based on the self-protection time of the skin, which varies considerably depending on the individual skin type. UV-radiation is especially strong in the months of April to September; from 11 a.m. to 4 p.m.

### Skin cancer risk for people working outdoors

People who work outdoors all day or are active outdoors have a higher risk of skin cancer than people who stay indoors. Although the sun provides important vitamin D, it also requires protection in the form of headgear, sunscreen and UV-protective clothing.

### UV-protective clothing provides additional protection alongside sunscreen

Certified UV-protective clothing offers the best protection: it blocks rays permanently without needing to be reapplied. Uncovered areas of skin should also be protected with sunscreen and headgear.

### Australian/New Zealand Standard AS/NZS 4399:2017

The most widely used standard worldwide is the Australian-New Zealand standard AS/NZS 4399:2017. It tests the UV protection of new, dry textiles under a simulated Melbourne sun spectrum. Clothing that meets this standard protects against UVA and UVB radiation. A product with UPF 50+ blocks over 98% of harmful rays and protects the covered areas of the body.

### Tested textile UV-protection

LABTECH Prüfungsgesellschaft mbH is officially accredited according to DIN EN ISO/IEC 17025:2005 and, as an independent laboratory, tests the UV protection factor of our textiles on the basis of this standard.

### The dangers of UV-radiation

UV-radiation also exists when the sun is not shining

Also penetrates the clouds

Exists independent of outdoor temperature

Penetrates loose tissue

Is reflected by surfaces such as metal, water, concrete

# SIZES, QUALITIES & CARE

## **Washing**

### Tub

The numbers in the tub indicate the maximum washing temperatures which must not be exceeded. The bar below the tub requires a more (mechanical) gentle treatment (e.g. programme for delicate fabrics). It designates washing programmes which are suitable for easy-care and delicate garments. Textiles made of cotton or mixed fibres should be pulled into shape when still wet. We recommend that textiles with prints or embroideries should only be washed at a maximum of 40 degrees in order not to affect the quality of the print or embroidery inside out.

Maximum washing temperature 95 °C normal process

Maximum washing temperature 60 °C normal process

Maximum washing temperature 60 °C gentle process

Maximum washing temperature 40 °C normal process

Maximum washing temperature 40 °C gentle process

Maximum washing temperature 30 °C normal process

Maximum washing temperature 30 °C gentle process

Hand washing, maximum washing temperature 40 °C

Do not wash

## **Bleaching**

### Triangle

Do not bleach

This symbol shows the textile cleaner whether the garment may be bleached or not.

## **Tumble drying**

### Tumble-Drier

The dots indicate the drying-grades of the tumble-drier. Textiles with transfer prints must not be tumble-dried.

Can be dried in a tumble dryer at a normal temperature of 80 °C, normal process, do not bleach, do not dry clean

Can be dried in a tumble dryer, low temperature 60 °C, gentle process

Do not tumble dry

## **Ironing**

### Iron

The dots indicate the temperature scale of the irons. Textiles with prints or embroideries should only be ironed inside out.

Ironing with a maximum temperature of 160 °C on the soleplate

Iron at a maximum temperature of 120 °C on the soleplate; ironing with steam may cause irreparable damage.

Do not iron

## **Dry Cleaning**

### Cleaning Drum

The letters are intended for the textile cleaner. They indicate the possible solvents. The bar below the circle requires cleaning under limited mechanical strain, with a limited amount of moisture and at a medium temperature. Textiles with prints or embroideries should not be dry cleaned.

Professional dry cleaning with perchloroethylene, dibutyl oxymethane and all solvents listed under symbol F, normal process

Professional dry cleaning with hydrocarbons (distillation temperature between 150 °C and 210 °C, flash point between 30 °C and 70 °C) and decamethylpentacyclosiloxane, normal process (distillation temperature between 150 °C

Do not dry clean
